Level 2 Economics 2020

91224 Analyse economic growth using economic concepts and models

2.00 p.m. Tuesday 1 December 2020 Credits: Four

| Achievement | Achievement with Merit | Achievement with Excellence |
|---|--|---|
| Analyse economic growth using economic concepts and models. | Analyse economic growth in depth using economic concepts and models. | Analyse economic growth comprehensively using economic concepts and models. |

Check that the National Student Number (NSN) on your admission slip is the same as the number at the top of this page.

You should attempt ALL the questions in this booklet.

If you need more room for any answer, use the extra space provided at the back of this booklet.

Check that this booklet has pages 2–11 in the correct order and that none of these pages is blank.

YOU MUST HAND THIS BOOKLET TO THE SUPERVISOR AT THE END OF THE EXAMINATION.

TOTAL

QUESTION ONE: Causes of economic growth

ASSESSOR'S USE ONLY

During 2020, the countries of the United Kingdom (England, Scotland, Wales, and Northern Ireland) left the European Union, allowing them to negotiate new trade agreements with other countries, including New Zealand.

Model One: Circular flow model

ASSESSOR'S USE ONLY

The United Kingdom's departure from the European Union allows it to enter into free trade agreements with New Zealand. The United Kingdom has many technology firms with highly efficient capital goods and production processes that at present are not sold in the New Zealand market.

New Zealand firms are likely to be created or expanded to sell into the United Kingdom market or to take advantage of the imported technology from the United Kingdom.

(b) (i) On Graph One, illustrate and label the shifts of aggregate demand AND aggregate supply that will occur over time if New Zealand increases trade with the United Kingdom.

Graph One: AD/AS model of the New Zealand economy

(ii)

| Referring to Graph One, fully explain the impact on gaggregate demand curve AND the aggregate supply | |

QUESTION THREE: Port locations and economic growth

ASSESSOR'S USE ONLY

Recent public discussion has focused on the movement of the Auckland port to another region. The existing port faces traffic congestion, environmental issues, limited opportunities to grow and inefficient export support services.

The value of cargo passing through the port is approximately \$25 billion annually, mainly imports. The port employs 600 workers directly, and thousands more indirectly.

Any new port location will require investment in rail, roads and other supporting infrastructure, as well as vacant land resources to allow for future expansion and the setting up of export and import support industries.

 $Sources: https://figure.nz/chart/3pjj1jT5nQpsvqn9-pxM295vtT54tMAW3 \\ https://www.transport.govt.nz/multi-modal/keystrategiesandplans/upper-north-island-supply-chain-strategy/sources. \\ https://www.transport.govt.nz/multi-modal/keystrategiesandplans/upper-north-island-supply-chain-strategiesandplans/upper-north-island-supply-chain-strategiesandplans/upper-north-island-supply-chain-strategiesandplans/upper-north-island-supply-chain-strategiesandplans/upper-north-island-supply-chain-strategiesandplans/upper-north-island-supply-chain-supply-c$

Compare and contrast possible impacts for New Zealand's economic growth if the Auckland port is moved to a new location (for example, Northport at Marsden Point, Northland).

In your answer, fully explain:

- two positive and two negative impacts for households in the new port location
- two positive and two negative impacts for firms in the new port location

| • | the long-term benefits for the New Zealand economy from the movement of the port. |
